Cocoa Butter

Botanical Name: Theobroma Cacao

Grade: Natural

Extraction By: Pure Prime Pressed

Parts Used: Seeds/Nuts

Appearance: Light Yellow Colour Solid, Typical Strong Cocoa Odour

CAS Number: 8002-31-1

Natural Cocoa Butter is light yellow colour, solid with strong chocolate-like odour for versatile application. It is one of the most stable fats known, containing natural antioxidants that prevent rancidity.

Cocoa Butter is extracted from cocoa beans. Cocoa beans are cleaned, fermented, roasted, and pressed. After that process, Cocoa Butter is separated from cocoa powder. Cocoa Butter contains a high proportion of saturated fats, derived from stearic and palmitic acids. It makes an excellent skin moisturizer. Saturated fats are especially beneficial for healing dry, cracked skin because they are easily absorbed and remain on the skin for hours, which helps restoring moisture. This very important for lip balms. Cocoa Butter contains compounds called cocoa mass polyphenols. Polyphenols are powerful antioxidants that help diminish signs of aging and soothe skin rashes. They help improve skin elasticity and skin tone.

Suggested cosmetic applications:

- Face and body skin care ranges including body butters and lip care products
- Cocoa butter has been widely used in products that help to prevent stretchmarks.
- Premium skincare ranges
- Increasingly used in haircare products, especially conditioners and treatments.

Benefits:

- Emollient properties, leaves the skin smooth and soft
- Enhances spread ability of finished products
- Melts quickly on contact with the skin. Penetrates easily into the epidermis
- Helps to stabilise emulsions and to adjust viscosity
- After application, the results are a rich, silky, elegant after feel on the skin
- Improves hair softness
